## **Synopsis for**

### Minor Assignment of CAL815/Web Technology

On

"BookRizz"

Submitted to Career Point University, Kota in Partial fulfillment of the requirement for the degree of

"Bachelors In Computer Application"

**Submitted by** 

# YASHIKA NAGPAL

(Semester-3)

**Under the Guidance of** 

Dr. Abid Hussain

School of Computer Applications,

Career Point University, Kota

Session 2023-2024

#### Introduction:

This book website is a website which is dedicated to a particular book or author. It is a great way to promote the book and provide readers with information about it.

This website includes books for education and knowledge purpose.

### **Objectives:**

- > To promote the book and increase sales
- > To provide readers with information about the book, such as the plot, characters, and themes
- > To provide readers with knowledgeable books that can change their life for good.
- User can read any book as they all are free.

# **Requirement Specifications:**

- The website should be easy to navigate and use.
- The website should include information about the book, such as the plot, characters, and themes.

#### **Modules:**

- A homepage with information about the book and the author
- A contact form so that readers can get in touch with the author
- Books are accessed in a pdf file

### **Conclusion:**

The book website is a great way to promote a book and provide readers with information about it. By carefully considering the objectives, requirement specifications, and modules of the website, authors can create a website that is both informative and engaging.

# **Future Scope:**

The future scope of book websites is exciting. As technology continues to evolve, book websites can become more interactive and engaging. For example, book websites could include features such as:

- Virtual reality book tours
- ➤ Interactive book quizzes and games
- The ability to purchase the book in multiple formats, such as ebook, audiobook, and print
